

TOGETHER, WE RAISE THE GAME.

Ask. Learn. Improve.

Basketball is about more than the game itself.

On courts and in communities across Victoria, children build confidence, young people develop resilience, volunteers strengthen communities, coaches become mentors, officials demonstrate leadership, and families form lifelong friendships. People of all ages experience the physical, psychological, and social benefits of being part of the game.

This is why Basketball Victoria exists.

OUR PURPOSE:

Through basketball, we connect communities to support the health, wellbeing and development of all Victorians.

Delivering on that purpose means so much more than simply facilitating basketball in this state.

It means working together with our member associations and clubs. Working with our schools, volunteers, coaches and officials. Governments, community organisations, and industry partners to create environments where people can participate, belong, develop, and thrive.

Because success is a team effort, and when we work together, it's a game changer.

We know families place enormous trust in basketball every time they bring a child to training, a game, or a club activity. Everything we do begins with creating a strong foundation and positive environments where children and young people are cared for and supported.

Our work extends to supporting mental health and wellbeing. Developing coaches, supporting volunteers, creating more inclusive environments, and sharing practical resources, programs, and partnerships, to strengthen both the game and the communities we support.

These initiatives also reflect how we work.

We know how important it is to keep the game moving forward. We believe better outcomes are achieved by listening, sharing knowledge and continually improving.

Like every community, every organisation, and every sport, there is always more we can learn and opportunities to improve.

Creating positive basketball environments - and continually strengthening them - is one of our most important responsibilities. It's not a one-off play. It's an ongoing commitment.

Every conversation helps move our community forward. That's why everything we do is guided by three simple principles: **Ask** questions. **Learn** together. **Improve** continuously.

Because when we ask more, learn more, and improve ...
Together, We Raise the Game.
